RESEARCH INTERESTS

Quantitative genetics and breeding methodology for optimizing genetic gain, increasing crop resiliency, and predicting plant response to stress. Polyploid genetics, whole genome duplications, epistasis, heterosis, neo- and sub-functionalization, applications of linear mixed models, genotype by environment interaction, phenotypic stability, genomic prediction, genomic selection, haplotype-based selection, genome-wide association, marker assisted breeding, high density linkage mapping, abiotic stress tolerance, productivity under drought, genotype by genotype symbiotic interactions, high throughput phenotyping, experimental design, spatial and temporal phenotypic analysis, incorporating historic data into modern analyses, breeding program optimization, swarm intelligence, mathematical optimization, public availability of genomic and phenomic data.

CURRENT APPOINTMENT

Postdoctoral Associate, Cornell University — July 2018 – present
Plant Breeding and Genetics
Robbins Lab
- Supervisor: Assistant Professor Kelly Robbins

RECENT APPOINTMENTS

T3 Data Curator, Wheat CAP — January 2017 – July 2018
The Triticeae Toolbox
Graduate research assistantship
- Supervisor: Adjunct Professor Jean-Luc Jannink

EDUCATION

Cornell University, Ithaca, NY

Ph.D. Plant Breeding and Genetics — August 2018
- Dissertation Title: *Homeologous epistasis in wheat: The search for an immortal hybrid*
- USDA NIFA National Needs Fellowship 2013-2016
- Advisor: Professor Mark Sorrells
- Minor: Applied Statistics

New Mexico State University, Las Cruces, NM

M.S. Plant and Environmental Sciences — July 2013
- Thesis Title: *Genetic mapping of carbon isotope discrimination in drought stressed tetraploid alfalfa (*Medicago sativa *L.)*
- Advisor: Professor Ian Ray
- Minor: Applied Statistics

B.S. Genetics — December 2010
- With Honors
- Advisor: Professor Ian Ray
- Minors: Biochemistry and Biology

CURRENT RESEARCH

US Alfalfa Farmer Research Initiative Grant August 1, 2019 – July 31, 2020

Evaluating Approaches to High-Throughput Phenotyping and Genotyping for Genomic Selection in Alfalfa

- Key personnel: project conception, grant proposal author, research lead
- PI: Kelly Robbins, Co-PIs: Don Viands, Julie Hansen
- National Alfalfa & Forage Alliance: $ 36,811

SUBMITTED PUBLICATIONS

Talks Available Online

[18] **Santantonio**, N. “Implications of Homeologous Gene Interactions for Breeding Allopolyploid Crops”. Exit Seminar. Cornell University, Ithaca NY. March 22, 2018. Youtube video link.

[19] **Santantonio**, N. “Some thoughts on epistasis in allopolyploids" Graduate Student Presentations. Cornell University, Ithaca NY. May 9, 2017. Youtube video link.

Expertise

Quantitative Genetics
- Theory development
- Simulation of genetic systems
- Autopolyploid and allopolyploid genetics
- Mathematical optimization

Statistics
- Generalized linear (mixed) models
- Genetic, spatial and temporal covariance structures
- Experimental design and analysis

Breeding Decisions
- G×E, genomic selection (GS), genome-wide association (GWAS)
- Linkage map construction and bi-parental QTL mapping in diploids/polyploids

High-throughput Phenotyping
- FAA remote pilot certification
- Aerial imaging, image processing, longitudinal modeling

Field
- Plot flail harvester, combine and tractor operation and maintenance
- Nursery experimental design, crossing designs, seed production and planting

Software and Programming Skills

Languages/Tools
- R, Python, LaTeX, Bash, git, ASReml, bwa, samtools

Software packages (see github.com/nsantantonio)
- Bilinear - Fit AMMI and GGE bilinear models for multi-environment trial data
- breedingProgramR - breeding program simulation wrapper for AlphaSimR

Fellowships and Awards

Cornell University
- USDA, NIFA National Needs Graduate Fellowship, August 2013– May 2016

New Mexico State University
- Graduate Research Enhancement Grant (GREG) award, 2011

Teaching Experience

Cornell University, Ithaca, NY

Co-Instructor Fall 2019
- Co-instructor for PLBRG 7420: Genotypes to Phenotypes: The Evolution of Genetic Modeling in Plant Breeding

Teaching Assistant Fall 2017
- Primary TA for PLBRG 2010: Plants, Genes and Global Food Production

Teaching Assistant Fall 2016 – Spring 2017
- Section Instructor for BIOMG 1350: Introductory Biology: Cell and Developmental Biology

Peer-Reviewer

Crop Science, Plant Genome, G3, Theoretical and Applied Genetics, New Phytologist

Diversity, Equity and Inclusion

Diversity Preview Weekend, Cornell University, Ithaca, NY

Co-leader 2019/2020
- Fundraising Chair

Professional Memberships

Genetics Society of America (2018–present)
National Association of Plant Breeders (2016–present)
